

Customer Storefront

Features built and demonstrated in the ROMP prototype

STOREFRONT & NAVIGATION

- Branded homepage with hero banner, seasonal sale strip and promotional message bar (free delivery over ₹1,499, gift wrap ₹99)
- “Shop by age” navigation across four developmental age bands — 0–2, 3–5, 6–8 and 9–12 years
- Header category menu driven by the admin-managed category list
- Global product search across product name, category and brand
- Trust badge strip — BIS certified, age-matched, 15-day returns, next-day dispatch
- Fully responsive design with a purpose-built mobile layout for every storefront screen
- Sticky mobile action bar with a context-aware button (Add to bag / Checkout / Pay)

PRODUCT DISCOVERY

- Product listing page with grid view, breadcrumbs, result counts and pagination
- Filter by age band, price range, category (with live product counts) and safety attributes
- Sort by Popular, Price low to high, Price high to low, or Rating
- Active filter chips with individual removal and a clear-all action
- Friendly empty state with a reset prompt when no products match
- Bestseller and New badges on product cards
- Wishlist heart toggle directly from any product card

PRODUCT DETAIL PAGE

- Image gallery with cover shot and additional photography
- Brand, age band, star rating and review count
- Variant selector for age, size or finish, with sold-out handling
- MRP struck through against selling price, savings percentage and GST-inclusive note
- No-cost EMI indicator shown alongside the price
- Quantity stepper with a live line total
- Add to bag and Save to wishlist actions
- Accepted payment methods displayed on the page — UPI, cards, netbanking, EMI, COD
- Pincode-based delivery date estimate and free-delivery check
- 15-day returns and free pickup assurance
- “In the box” contents list
- “Skills it builds” developmental tags
- Verified parent review

SHOPPING BAG

- Line-level quantity increase, decrease and remove
- Save for later
- Stock urgency messaging (e.g. “Only 6 left in Bengaluru”)
- Gift wrap and handwritten note add-on at ₹99
- Coupon entry with code validation, minimum-cart rules and clear error messaging
- Suggested coupon codes surfaced to the shopper
- Applied coupon shown with savings and one-click removal
- Loyalty coins applied automatically to the order
- Order summary with subtotal, discount, delivery, gift wrap, coins and GST breakdown

CHECKOUT

- Three-step guided checkout — Shipping, Payment, Review — with a progress indicator
- Saved address book with select, edit and add-new-address
- Delivery speed choice — Standard free vs Express ₹149 — with arrival estimates
- Gift order option that hides prices on the invoice
- Six payment methods — UPI, credit/debit card, netbanking, wallets, EMI 3–24 months, and cash on delivery
- UPI via app shortcuts (GPay, PhonePe, Paytm, BHIM), UPI ID entry with verification, and QR with expiry timer
- Card form with RBI-compliant tokenised card saving and no-cost EMI options

- Netbanking with popular banks plus search across 58 banks
- Cash on delivery with OTP confirmation, handling fee and gift-wrap restriction
- Final review screen with editable address and payment selection
- Live payment overlay showing bank authentication and 3-D Secure progress
- Security messaging throughout — PCI-DSS, 128-bit encryption, card tokenisation

ORDER CONFIRMATION

- Payment captured confirmation with order number
- Delivery timeline — placed, packed, out for delivery, delivered
- Itemised order recap with amount paid and gateway reference
- Invoice emailed automatically and tracking sent by SMS
- Loyalty coins earned on the order

MY ACCOUNT

- Order history with status chips, arrival estimates, invoice download and Track / Buy again / Review actions
- Order filters for All, In transit and Returns
- Address book management
- Saved payment methods (tokenised cards and UPI IDs) with default tagging and removal
- Wishlist with empty state
- ROMP coins wallet with balance and a full earn-and-redeem ledger
- Refer & earn — personal code, WhatsApp / link / email sharing, referral stats and friend-by-friend status
- Kids profiles with name, age and interests to power age-matched recommendations

Admin Backoffice Portal

Features built and demonstrated in the ROMP prototype

PORTAL SHELL

- Desktop backoffice with persistent left navigation across nine modules
- Global search across orders, SKUs and customers
- Date range selector on reporting views
- Context-aware primary action on every screen (Add product, Bulk fulfil, Export CSV and so on)
- Settlement status indicator in the sidebar
- Signed-in operator identity and role shown at all times

DASHBOARD

- KPI cards for revenue today, orders, average order value and payment success, each with a period-on-period change
- 14-day revenue bar chart with period total and peak day
- Low stock alerts by SKU with a create-purchase-order action
- “Orders needing action” feed with payment and fulfilment status
- Exportable performance report

ORDERS

- Pipeline counters — unfulfilled, packed, in transit, COD due, returns open
- Order table with customer, city, items, total, payment status and fulfilment status
- Colour-coded status chips for captured, failed, refund requested, COD due and on hold
- Order detail pane with shipping address, line items and totals
- Gateway reference and payment trail on every order
- One-click fulfilment advance — Unfulfilled to Packed to Shipped to Delivered
- Print packing slip
- Refund or cancel directly from the order
- Bulk fulfilment action

PRODUCTS & CATALOGUE

- Catalogue table with saved views — All, Active, Draft, Out of stock, Missing BIS certificate
- Row selection with bulk actions — edit prices, change age band, unpublish
- Product editor with five tabs — Details, Variants, Inventory, Media and SEO
- Details tab — name, description, brand, category and age band
- Variants tab — add or remove variants with per-variant SKU, price, stock and live toggle, plus option sets
- Inventory tab — selling price, MRP, SKU, HSN and GST code, and warehouse-wise stock across Bengaluru, Delhi and Mumbai
- Media tab — cover image, drag-to-reorder gallery and upload with image spec guidance
- SEO tab — page title, meta description, URL slug, indexing control and Google result preview
- Publish status of Active or Draft with a last-edited audit line
- Safety and compliance block — BIS certification, BPA-free, small parts warning and certificate validity
- Per-product performance — units sold, revenue, return rate and page views over 30 days
- New product creation flow with draft-completion guidance

CATEGORIES

- Category table with slug, parent category and product count
- Create, edit and delete categories
- URL slug generated automatically from the category name
- Parent and child category nesting
- Toggle any category into the shopper's filter sidebar
- Toggle any category into the main storefront navigation
- Taxonomy stats — total categories, categories in filters, categories in nav, uncategorised SKUs
- Changes go live on the storefront immediately

DISCOUNTS & COUPONS

- Coupon list with code, rule, usage against cap, active window and status — Active, Scheduled, Paused or Expired
- Discount builder supporting four types — percentage off, rupee off, free shipping and buy-one-get-one
- Value, minimum cart and usage cap configuration
- Scope a discount to selected collections, categories or age bands, or leave blank for the whole catalogue
- Rules for one use per customer, stacking with loyalty coins, and first-time customers only
- Scheduled active window with start date, end date and timezone
- Live shopper-facing preview and the saving applied to a test cart
- Forecast panel — eligible carts, estimated redemptions, discount cost and margin after discount
- Schedule the discount or save it as a draft

PAYMENTS & REFUNDS

- Payment KPIs — captured today, failed, refunded over 7 days, and COD collected
- Transaction ledger with gateway reference, order, method, amount, time and status
- Status filters for All, Captured, Failed and Refunded
- Per-transaction actions — refund, send retry link, view receipt
- Refund window supporting full or partial refunds with amount, reason code and restock option
- Gateway health monitor showing success rates by UPI, cards, netbanking and COD
- Failure diagnostics with automatic retry links to the payer
- Settlement panel — next payout amount, time, destination bank, fees and TDS
- Settlement report export

CUSTOMERS

- Customer base metrics — total customers, repeat rate, average lifetime value and kids profiles added
- Customer table with city, order count, lifetime spend, last order date and tier
- Customer detail pane — orders, lifetime value, average order value and loyalty balance
- Contact details and kids profile data for age-band targeting
- View full order history and grant loyalty coins
- Export the customer list to CSV

TEAM & PERMISSIONS

- Team roster with name, email, role, status and last activity
- Five predefined roles with scoped access — Owner, Ops manager, Catalogue editor, Finance and Support agent
- Role scope reference visible in-product so the right role is picked
- Invite a teammate by work email with role selection and email validation
- Resend or revoke pending invites, which expire after 7 days
- Two-factor authentication enforced before a teammate's first login
- Team stats — active members, pending invites, roles in use and 2FA status

PAYMENT & CHECKOUT SETTINGS

- Payment method toggles with per-method success rate and transaction cost shown
- Gateway behaviour flags — 3-D Secure enforcement, auto-capture versus manual capture, and sandbox test mode
- Sandbox banner across the backoffice whenever test mode is on
- COD rules — handling fee, maximum cart value, OTP requirement and automatic pincode suppression
- Gateway account details — merchant ID, live key reveal, webhook URL and webhook health
- Settlement configuration — cycle, destination bank, platform fee and auto-refund window
- All setting changes apply to the storefront instantly

Future Enhancements & Suggestions

Recommended next phases, not included in the current prototype

DISCOVERY & MERCHANDISING

- Personalised recommendations driven by kids profiles and browsing history
- Gift finder wizard — age, budget and interest into a curated shortlist
- Bundles and “frequently bought together” kits
- Richer product media — 360° spin, unboxing video and AR preview at home
- Customer reviews with photo and video upload plus verified-purchase moderation
- Questions and answers on product pages
- Back-in-stock and price-drop alerts
- Recently viewed and continue-where-you-left-off
- Multilingual storefront in Hindi and key regional languages

CONVERSION & RETENTION

- Guest checkout and one-tap reorder
- Abandoned cart recovery over WhatsApp, email and SMS
- Subscription or toy-of-the-month box
- Birthday reminders with scheduled gift delivery
- Tiered loyalty programme with milestone rewards
- Store credit and digital gift cards
- Shareable wishlists for birthdays and gift registries

FULFILMENT & LOGISTICS

- Live courier integration with real-time tracking on the order page
- Pincode-level serviceability and promise-date engine
- Multi-warehouse allocation with split shipments
- Self-serve returns and exchange portal with pickup scheduling
- Automated packing slip, shipping label and manifest generation
- Store pickup and dark-store fulfilment options

OPERATIONS & ANALYTICS

- Purchase orders, supplier management and automated reorder points
- Barcode or QR based stock take and inbound receiving
- Bulk catalogue import and export via CSV
- Advanced analytics — cohort retention, funnel drop-off and category profitability
- Custom report builder with scheduled email delivery
- Full activity log and audit trail per user
- Custom roles with granular permissions beyond the five presets
- Scheduled publishing for catalogue and price changes
- Automated low-stock and payment-failure alerts to WhatsApp or Slack

MARKETING & GROWTH

- SEO content pages, blogs and gift buying guides
- Marketplace and social channel sync — Amazon, Flipkart, Instagram Shop
- Google Shopping and Meta catalogue feeds
- Campaign attribution and UTM-level reporting
- A/B testing on the homepage, product page and checkout
- Email and WhatsApp marketing automation journeys
- Affiliate and influencer programme layered on the existing referral engine

PLATFORM & COMPLIANCE

- Native iOS and Android apps with push notifications
- Progressive web app with offline browsing
- GST-compliant e-invoicing with automated invoice numbering
- Safety certification document vault with expiry tracking
- WCAG 2.1 accessibility compliance
- Role-based masking of customer personal data
- Multi-currency support and international shipping
- Headless API layer for B2B, franchise and partner channels
